SUMMARY

Front End Developer experienced in utilizing updated technologies to design satisfying user interfaces. Quick learner determined to go the extra mile to tackle complex challenges. Eager to take part in cutting-edge innovations of the tech world.

SKILLS & INTERESTS

- **Skills:** JavaScript, React, React Native, Next.js, Redux, HTML5, CSS3, SCSS, Tailwind, Responsive Web-Design.
- **Technologies:** Figma, Git, Github, Firebase.
- **Interests:** Music production, food, hiking, poker, music venues, White Sox, Settlers of Catan.

WORK EXPERIENCE

Chicago Future Fund FTX

June 2022 – Present

Lead Developer

Chicago, IL

- The Chicago Future Fund FTX is Equity and Transformation's (EAT) and FTX's guaranteed income program that gives \$500/month and no-fee banking services to 100 formerly incarcerated individuals for one year.
- Oversaw the core structure, design, and implementation of www.eatfuturefund.org using modern React hooks.
- Assembled a fully responsive UI with CSS3 and SCSS consisting of video backgrounds, slideshows, text animations, and page transitions for an engaging user experience.
- Optimized application scalability for multiple devices using compressed media files and lazy-loading.
- Developed a mobile-friendly user portal for program participants to take monthly surveys, schedule phone interviews, access resources, and contact support via hotline and live chat.
- Created an authentication system using Firebase to log participant information for **100+ active users**.
- Integrated 3rd-party software using APIs and cloud functions (Intercom, Typeform, Calendly, Strive, Firebase).
- Collaborated with EAT staff to ensure the project remains within the defined scope, budget, and timeline.
- Facilitated weekly meetings with developer intern to delegate program tasks and provide mentorship.

PROJECTS

NFT Marketplace App

React Native

- Built a mobile NFT Marketplace App that allows users to browse and bid on NFTs with React Native.
- Compiled a search filter for greater public accessibility and easy navigation.
- Mapped out titles, subtitles, images, and price properties for each NFT.

Airbnb Clone

React

- Replicated the core design of Airbnb's landing page using Figma's design and inspection tools.
- Arranged reusable React components to produce new and updated listings with current availability.

EDUCATION

University of Illinois at Urbana-Champaign

Bachelor of Arts, Music Technology

May, 2019

Urbana-Champaign, IL
